Former Director, ICAR-National Bureau of Agricultural Insect Resources,
Bengaluru & Former Project Coordinator, AICRP on Biocontrol
Email: ballalchandish@gmail.com

Edited by- MJ Vasudeva Rao, Advisory Board Member, ATPBR, and
Dr. Nagraani Mahajaan, Publication Director, ATPBR.

Year- 2024

Publisher - ATPBR
Foundation for Advanced Training in Plant Breeding

About this book :

Dr. Chandish Ballal discusses the significance of insects in ecosystem services, emphasizing their role in biodiversity, food resources, pollination, plant protection, and waste decomposition. She highlights the value of biological control for managing serious indigenous and invasive pests, showcasing successful examples from India. The talk explores the economic, environmental, cultural, and mythological importance of insects, underlining their crucial role in ecological balance and the need for their conservation.
